

U.BI.TEACH: Bringing Urban Biodiversity into Higher Education **TIME TO SAY GOODBYE**

After months of collaboration, learning and exchange, U.BI.TEACH is coming to a close. Together, our partners have explored how higher education can help students understand urban biodiversity and take an active role in improving the places where they live.

Three results, one shared vision

The project's work has been organised around three complementary results.

- The **U.BI.TEACHing Pack** supports higher education teachers through a Competence Model on Urban Biodiversity and a Teaching Methodological Repository. Together, they offer a framework for developing teachers' skills and bringing innovative approaches into urban biodiversity education.
- The **U.BI.TEACH Training Toolkit** brings together learning materials and a digital learning space. Its Learning Snacks offer short, accessible opportunities for teachers to explore new ways of teaching urban biodiversity, while the toolkit supports their use in higher education.
- The **U.BI.TEACH Urban LAB.O.** connects learning with local needs. Through urban observatories and project labs, it provides a space to explore biodiversity challenges and develop student ideas using Service-Learning. This approach encourages students to apply their knowledge in collaboration with their communities

SHARING THE JOURNEY IN BRUSSELS

On 10 September 2026, the partnership gathered in Brussels for the final project meeting and conference. These events offered an opportunity to share the work developed across the project, reflect on the lessons learned and discuss how its results can continue to support higher education and local action.

U.BI.TEACH leaves educators and students with resources they can use to explore urban biodiversity, connect classroom learning with real places and work alongside their communities. We hope the ideas and partnerships developed through the project will continue to inspire action for greener, more biodiverse cities.

Thank you to all the teachers, students, partners and local stakeholders who contributed their time, knowledge and ideas to U.BI.TEACH.

The Partners

Our project is supported by esteemed institutions across Europe:

- **University of Zaragoza (Spain):** Leading the project with a rich history in higher education and research.
- **Klaipėdos valstybinė kolegija (Lithuania):** Offering modern facilities and a strong international profile.
- **European Association of ERASMUS Coordinators (Cyprus):** Facilitating collaboration among ERASMUS+ coordinators.
- **IDEC (Greece):** Providing training, consulting, and digital solutions.
- **European Digital Learning Network (Italy):** Addressing digital skills and learning opportunities.
- **Ghent University (Belgium):** Promoting internationalization and competence-oriented education.
- **North-East Regional Development Agency (Romania):** Driving regional development and sustainable growth.
- **AETU (Spain):** Innovating in urban biodiversity education.
